

SPIRIG-30 **Pocket-Microscope** SPIRIG-100

handy, self-illuminating, useful and economic.

Todays parts, components, structures continue to be even more miniaturised. Without convenient technical support human eyes can not follow such advancements.

"Light and Sight" are needed as help and assistance!

The new models 30- and 100-power SPIRIG pocket microscopes make it happen.

In use the 30- respectively the 100-power SPIRIG pocket microscopes are positioned onto the surface to be inspected, the built-in illumination activated by a slide switch on the side, and then the image focused with the also side located thumb wheel.

The "pocket mics" fit smoothly into the hand palms of big and small. Within seconds the micro-cosmos can be explored at micro-cost. The Spirig's will not and can not replace full grown microscopes, but if you need a detailed view these ones will be ready.

11498_5038

The Spirig-100 includes a useful stand to which also the model Spirig-30 will fit.

Userfriendly: for overview slide out the 8-power magnifier lens.
