

SPIRIG-40 Pocket-Microscope SPIRIG-100

handy, self-illuminating, useful and economic

Today's parts, components, structures continue to be even more miniaturised. Without convenient technical support human eyes can not follow such advancements. "Light and Sight" are needed as help and assistance! The 40- and 100-power SPIRIG pocket microscopes make it happen.

The new model SPIRIG-40 is now available with LED illumination and scale in the visual field.

In use the 40- respectively the 100-power SPIRIG pocket microscopes are positioned onto the surface to be inspected, the built-in illumination activated by a slide switch on the side or by swinging open the battery compartment, and then the image focused with the also side located thumb wheel.

The "pocket mics" fit smoothly into the hand palms of big and small. Within seconds the micro-cosmos can be explored at micro-cost. The Spirig's will not and can not replace full grown microscopes, but if you need a detailed view, these ones will be ready.

Swinging open the battery compartment turns the illumination on.

The Spirig-100 includes a useful stand.

A stand for the Spirig-40 is available on request.
